

Mi Luggage Classic 20"

Travel further, explore more

[Black] ID: 23940; SKU: XNA4086GL

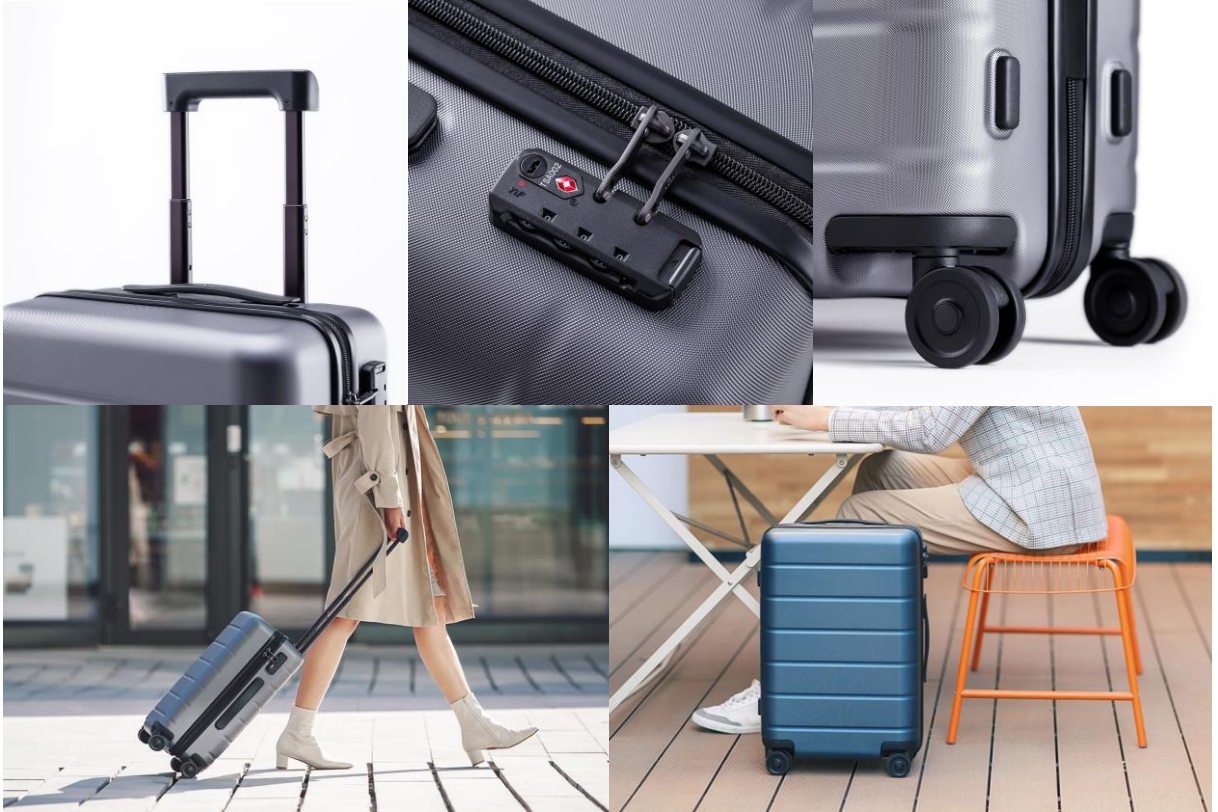

[Blue] ID: 23941; SKU: XNA4087GL

[Gray] ID: 23942; SKU: XNA4088GL

- **Robust and lightweight.** The shell is made of recyclable Covestro PC (polycarbonate) material with 3-layer composite compressive structure: wear-resisting, highly resilient, and not easily deformed. It weighs only 3.3kg, ensuring a travel without burden.
- **20" carry-on with 38L capacity.** A standard-sized suitcase that is allowed on the plane. Pack up your clothes, personal care stuff and other necessities, and get ready to set out.
- **Good pressure resistance.** Tiny honeycomb dot ripples make the shell surface anti-scratch. Horizontal strips and grooves provide additional support and reduce stress while impacted.
- **Dual-bearing spinner wheels, smooth and ultra-silent.** Made of highly elastic TPE material, the 360° noise-minimizing and shock-absorbent wheels help the luggage to be effortlessly and silently carried across complicated ground surfaces, no matter carpet or gravel.
- **Sturdy and unhindered pull rod.** The aluminum alloy pull rod is extractable with 4 levels of adjustable heights. The ergonomically designed handle closely suits the palm. Sophisticated structure, smooth extraction and retraction, strong for use, and super feeling in hand.
- **A TSA lock for improved safety.** It comes with a TSA code lock which allows your luggage to be unlocked and inspected by customs security authorities without damage.

Mi Luggage Classic 20"
