PRODUCT UPDATE

AUGUST 2022 SMARTWATCH AND CYCLING COMPUTERS FEATURE UPDATE

In an ongoing effort to improve our products and provide enhanced features to existing users, we are excited to announce the August 2022 smartwatch and cycling computers feature update. The update provides improved functionality and new features throughout our devices.

The free software updates will begin rolling out to select devices today and continue over the coming weeks. Customers can update their smartwatch or cycling computer by enabling automatic updates from their device or by using Garmin Express™.

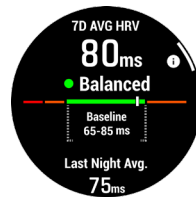

Please see below for a few featured highlights found in the update as well as a detailed reference table at the end of the document.

SMARTWATCHES:

New notable features in this software release for fēnix® 7 series, epix™ (Gen 2), Instinct® 2 series and Forerunner® 945 LTE (coming soon) smartwatches include:

SATIQ™ TECHNOLOGY:
To help maximize battery life, SatIQ will automatically turn on multi-band GPS in areas where it's needed most, like narrow canyons or downtown areas with tall buildings, then turn it off when it's no longer needed to ensure athletes get the most out of their battery.

HEART RATE VARIABILITY (HRV) STATUS:
Track heart rate variability while sleeping to get a better handle on recovery and an overall wellness picture.¹

RACE WIDGET:
View race prep information — including a race day-specific performance prediction, race day weather and a countdown clock — all in one widget.

UPDATED TRAINING STATUS:
Using new indicators such as HRV status, recent exercise history and performance, athletes will receive insights into their overall effort and whether they are training productively, peaking or strained.

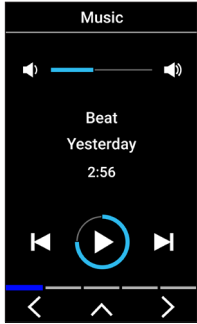

STOCK TRACKER:
Keep track of up to 50 stocks – right from the wrist – with the Stocks app. Easily check stocks at a glance to monitor their prices and trends throughout the day.²

AUGUST 2022 SMARTWATCH AND CYCLING COMPUTERS FEATURE UPDATE

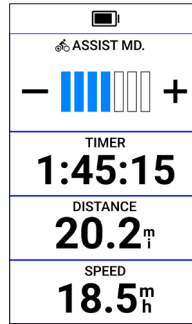

CYCLING COMPUTERS:

New notable features in this software release for Edge® 1040 series of cycling computer include:

MUSIC CONTROLS:

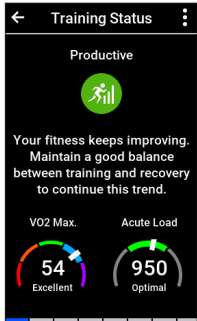

When paired to a compatible smartphone, control music right on the Edge device.

FULL EBIKE SUPPORT

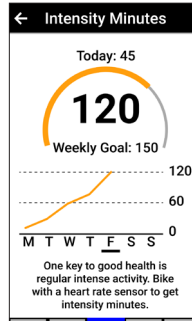

Connect an ANT or ANT+ compatible eBike to view custom eBike data, adjust assistance levels and see remaining range based on a planned course.

Screenshot shown is for ANT+ LEV compatible eBikes.

TRAINING STATUS:

Using new indicators such as HRV status, recent exercise history and performance, receive insight into overall effort and whether training is productive, peaking or strained.³

INTENSITY MINUTES:

See when intensity minutes were earned during each ride.³

¹Activity tracking accuracy

²When paired with your compatible smartphone. All data provided on the Garmin Stocks Tracker app is provided for informational purposes only and is not intended for trading or investing purposes. See [Twelvedata.com/stocks](https://www.twelvedata.com/stocks) for stock exchanges covered by the Stocks app
