Compact packing (knock-down), description enclosed.

Timeless surround Baza can be equipped with the bio ethanol insert Riano with the safest fire.

Material	MDF, with high quality smooth varnish
Colour	White
Dimensions surround (HxWxD):	938x980x340 mm
Dimensions packing (LxWxH):	1030x400x150 mm
Weight	25 Kg

Compact packing (knock-down), description enclosed.

Timeless surround Elda can be equipped with the bio ethanol insert Riano with the safest fire.

Material	MDF, with high quality smooth varnish
Colour	White
Dimensions surround (HxWxD):	938x980x340 mm
Dimensions packing (LxWxH):	1030x400x150 mm
Weight	25 Kg

Compact packing (knock-down), description enclosed.

The Corato is a modern wall surround equipped with the Ruby Fires Ceramic Burner.

Material:	stee/stainless steel
Dimensions surround (HxBxD):	533x730x220 mm
Dimensions packing (HxWxD):	615x770x250 mm
Weight:	17.5 Kg

More information about the Ruby Fires Ceramic Burner can be found on page 4

CORATO

The Serra is a modern wall surround equipped with the Ruby Fires Ceramic Burner.

Material:	steel/stainless steel
Dimensions surround (HxBxD):	482x652x194 mm
Dimensions packing (HxWxD):	500x670x210 mm
Weight:	16.5 Kg

More information about the Ruby Fires Ceramic Burner can be found on page 4

SERRA

Insert

Bio ethanol insert Riano with Ruby Fires Ceramic Burner

Material:	steel, coated
Color:	Black
Dimensions insert (HxWxD):	432x602x194 mm
Dimensions packing (HxWxD):	505x615x210 mm
Weight:	15 Kg

More information about the Ruby Fires Ceramic Burner can be found on page 4

RIANO

Ceramic Burner

by RubyFires

In contrary to "open bio-burners", the Ruby Fires ceramic burner has a core of ceramic brick. This brick works as an absorbing core, which completely takes in the bio-fuel. Therefore the fuel cannot be accidentally spilled and even under a slope it is not possible for the liquid fuel to escape.

Besides, it is not the actual liquid fuel that burns, but the evaporation from the ceramic core, which not only makes it more economic due to its low consumption of fuel, but it also gives beautiful yellow flames that are always visible on the top of the burner.

Because of the built in safety system, it is simply not possible to fill the burner while it is in use. During the filling-process, the burner is closed off and only the filling opening is opened.

The Ruby Fires ceramic burner is DIN 4734-1 certified.
